Web developer with 10+ years of experience, specializing in React.js applications and frontend infrastructure. I progressed from a freelance developer to leading frontend teams, with expertise in optimizing build processes and improving development workflows. Throughout my career, I've significantly improved build performance at Visme, contributed to popular open-source projects with millions of weekly downloads at Cube, and successfully migrated large codebases from JavaScript to TypeScript at Sbermarket. I excel in React, TypeScript, and frontend build tooling while maintaining several open-source projects and creating developer tools that solve real-world problems.

Technical Skills: React, TypeScript, JavaScript, Redux, Webpack, Jest, Node.js, HTML, CSS, SCSS, PostCSS, Redux Toolkit, Mobx State Tree, Rollup, SWC, Vite, Vitest, Storybook, NestJS, Docker, Git, GitHub Actions, GitLab CI, TeamCity

WORK EXPERIENCE

Senior Frontend Engineer
03.2025–10.2025

Social Discovery Group

Developer in the product team. Worked on developing and maintaining a web application using Next.js.

Senior Frontend Engineer
04.2023–01.2025

Visme | *Online design and presentation platform for creating visual content*

Drove infrastructure team initiatives, focusing on frontend code refactoring and build process optimization.
- Significantly improved project build performance, reducing compilation time by an estimated 2.5x times
- Proposed technical solutions, codebase improvements, and technology choices.
- Migrated the project from Yarn to PNPM, significantly improving package installation speed both locally and in CI by 2-3 times, leading to faster development cycles and deployment efficiency.
- Optimized web page loading speed through lazy-progressive data loading.

Open Source Ecosystem Engineer
10.2021–03.2023

Cube | *Analytics API platform for data applications*

Maintained and enhanced open-source data visualization projects, improving ecosystem tools and project infrastructures.
- Contributed to Chart.js with 2.5M weekly downloads, improving documentation and fixing critical bugs
- Partially migrated Chart.js codebase to TypeScript, improving type safety and developer experience
- Completely rewrote Chartist (100K weekly downloads) to TypeScript, modernizing its architecture
- Maintained and contributed to react-chartjs-2 (1.5M weekly downloads), svelte-chartjs (50K weekly downloads), and vue-chartjs (400K weekly downloads)

Frontend Teamlead
03.2020–09.2021

Sbermarket | *Online grocery delivery service in Russia*

Led frontend infrastructure team, driving technological modernization and development practices.
- Successfully migrated a large codebase from JavaScript to TypeScript, improving code quality
- Designed and implemented a custom SSR server
- Implemented imgproxy for catalog image processing, reducing image load times by 10x times through .web and .avif format optimizations
- Led my team in redesigning catalog pages, resulting in a 2x increase in page views and significantly enhancing user engagement and navigation experience.

Frontend Teamlead
05.2018–03.2020

INGIPRO | *Engineering software solutions provider*

Frontend Web Developer
08.2017–05.2018

LeadCooker Inc | *Lead generation and marketing solutions company*

Full Stack Engineer
01.2015–08.2017

LeadBean / Clumus / CRM Sibiri

Web Developer
01.2012–12.2015

Freelance | *Independent web development services*
